Polyblade

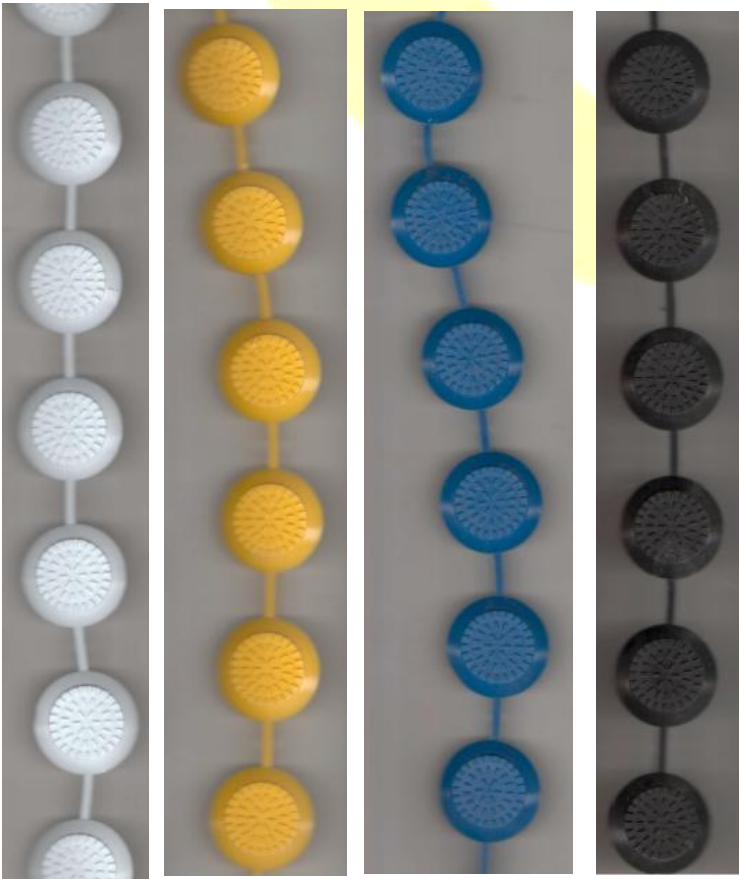

Polyblades are a quick and effective alternative to individual Polystuds, inter-connected by a single strip representing a deep, 10mm blade, creating an even line. Installation is performed by a masonry wall-chaser, to achieve a definite straight line. This form of tactile indicator is most suited to concrete and exposed aggregate surfaces, and can create appealing aesthetic value that cannot otherwise be achieved with a retrofit Polypad.

Blue Polyblade Installation

Yellow Polyblade – Ireland Motors, Mulgrave Rd

Polyblades are available in four primary colours

– Black, Yellow, Ocean Blue and White
